Bernard Ryan Sim Kang Xuan

Software Engineer · Founder of RyannSuite

Cyberjaya, Malaysia ryansim727@gmail.com ryannsuite.pages.dev github.com/BERNARDRYAN
linkedin.com/in/bernard-ryan-kang-xuan-sim-1b17792a7/

Final-year Software Engineering student at Multimedia University, graduating November 2026, with a focus on frontend development. During an industrial traineeship at 7-Eleven Malaysia I built an internal e-sourcing platform from scratch; on my own I design, build and ship RyannSuite, three live web apps running on Cloudflare. Open to graduate software engineering roles.

EXPERIENCE

Industrial Trainee 27 Jul 2026 - 18 Oct 2026
7-Eleven Malaysia · IT Department – Development Team

- **E-Sourcing Platform** — Built from scratch — an internal user platform with Microsoft login.
- **Printing Service** — Worked across frontend and backend; implemented the customer app UI revamp from a provided prototype, identifying and implementing improvements along the way.
- **DSIP (Digital Sales Integration Platform)** — Contributed to development.

INDEPENDENT WORK

Founder & sole developer
RyannSuite

Design, build and ship a suite of web apps end to end — RyannPlan, RyannPace and RyannReceipt — from database and APIs to UI, deployed on Cloudflare.

- **RyannPlan** — Plan, budget and settle group trips in one place. `ryannplan.pages.dev`
- **RyannPace** — Turn your run into a magazine-cover poster. `ryannpace.ryannpace-app.workers.dev`
- **RyannReceipt** — Track spending fast; print a retro receipt anytime. `ryannreceipt.ryannsuite.workers.dev`

OTHER PROJECTS

- **Knowledge Hub** (Hack Day, Multimedia University) — A student-sourced study platform where peers share tutorials and past-year papers, with AI auto-filling and note summarisation to organise content.
- **Robot War Simulator** (Coursework · C++) — A turn-based 2D battlefield game with robot upgrades and evolving abilities, built on OOP with abstract base classes for modular movement and attack logic.
- **Course Registration Application** (Coursework · Python · Tkinter · SQLite) — A desktop app that digitalises student enrolment and enforces class limits.

EDUCATION

Bachelor of Computer Science (Software Engineering) Oct 2023 - Nov 2026 (expected)
Multimedia University (MMU) · Faculty of Computing and Informatics · CGPA 3.75 / 4.00

SKILLS

Languages	TypeScript, JavaScript, HTML / CSS, Python, Java, C++, SQL
Frontend	Next.js, React, Tailwind CSS, Vite, PWAs / offline
Backend & Data	Supabase / PostgreSQL, Firebase, SQLite, REST APIs, Cloudflare Workers
Auth	Microsoft / Entra ID sign-in, Google sign-in (OAuth)
Tools & Design	Git, Cloudflare Pages, VS Code, Figma
Foundations	OOP / OOAD, Software design, Database design

LANGUAGES & INTERESTS

Languages	English, Chinese, Malay
Interests	Running, Badminton, Bouldering, Travel, Gym
